## Three-Pass Hot Water Boiler

### Optimum heat transfer, environment friendly

- \* 6-8 bar operating pressure
- \* Up to 94,4% efficiency
- \* Optimum thermal balancing and heat energy use, effective heat use, three passes for reduced operation costs
- \* Uninterrupted passes in all three passes and balanced cooling of flue gases resulting in extended service life.
- \* Robust boiler construction thanks to symmetrically positioned heat transfer surfaces.
- \* Damage to environment is minimized by low chimney gas emissions.
- \* High operation safety thanks to integrated ejector spaces designed for equal (homogeneous) temperature distribution and plates redirecting returning water to hot parts of the boiler
- \* Optimum heat transfer thanks to three-pass burning principle and water cooled reversal chamber.

### EUROMAX Liquid and Gas Fired Three-Pass Hot Water Boiler
